

Health & Safety
Consultancy & Training

we can assist you with

about us

SMS Europe has been established 20 years and is one of the longest established independent Health and Safety Consultancies in the North of England. Over that period we have accumulated a wealth of knowledge on Health and Safety, providing Health and Safety Consultancy to both the public and private sectors in the Yorkshire regions and throughout the UK. Our Health and Safety Consultants are registered on the Health and Safety Executives Occupational Safety and Health Consultants Register and are able to provide a first class bespoke personal Health and Safety service to any customer in a professional and friendly manner.

why SMSE?

We can keep your employees safe and your business protected and are small enough to care, yet large enough to cope. You can rely on us to help you out of a tight spot if you need documentation or Health and Safety advice quickly!

IOSH Managing Safely Courses

We run a number of IOSH Managing Safely open courses throughout the year at quality venues, and we also run in-house corporate courses.

how we can help

health and safety policy and management system

Whatever an organisations size or structure, SMSE has the experience and expertise to produce a Health and Safety policy and management system that fits its needs. Everything is tailored to fully reflect your business operation needs and comply with both the Health and Safety at Work Act 1974 and the Management of Health and Safety at Work Regulations 1999.

competent person

It is a requirement under the Management of Health and Safety at Work Regulations 1999 to have a designated competent person. We can act as the "Competent Person" for your organisation. Our designated competent person service provides you with access to a qualified and accredited Health and Safety practitioner 24 hours a day, 7 days a week.

on site audit

An on-site audit of Health and Safety allows an organisation to understand where it is in terms of safety. Our Health and Safety experts will attend site and can conduct an assessment in a variety of formats that can measure the performance of your operation or focus on a specific element of an activity. The audit can examine all aspects of Health and Safety Management within the company and the accompanying report will define any actions required.

general consultancy and advice

Your designated consultant will provide you with general consultancy and advice including any new legislative changes. They will be available to speak to at any time on Health and Safety matters, spending time on site if required at your convenience.

risk assessments

Risk assessments can never be too good. We can write and produce appropriate, thorough and detailed risk assessments for your business, which will incorporate safe systems of work.

manual handling assessments

We can complete manual handling risk assessments and audits in line with the Manual Handling Operations Regulations 1992. The format for all our documentation has been specifically designed to encompass the best practices available and incorporates elements of the HSE's MAC and ART tools.

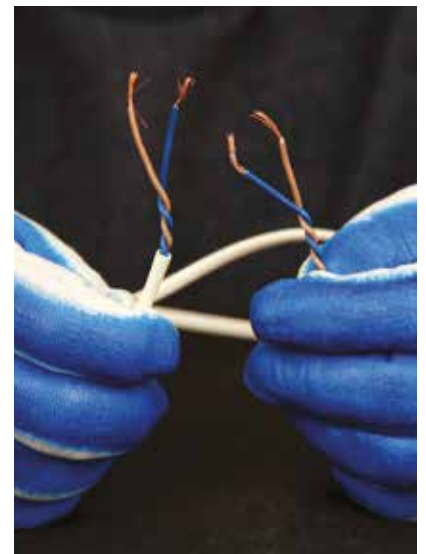

fire risk assessments

We can carry out a legally compliant Fire Risk Assessment of your premises in order to help you meet your obligations under the Regulatory Reform (Fire Safety) Order 2005. Our qualified fire risk assessors are experienced in a wide range of buildings and we provide detailed and through fire risk assessments based on the PAS79 model.
